PROJECTS

User Management System
- Developed a User Management Application using **React** with integration of the JSONPlaceholder API for performing full **CRUD** operations.
- Designed responsive UI with smooth user interactions and efficient state management using **React Hooks**.
- Enhanced user experience with proper form handling, validation, and error management.

Firebase Auth System
- This **React JS** project supports email-based login and signup with **Firebase Authentication**, including input validation, error handling, and session management.
- Leverages **Tailwind CSS** to create a clean, responsive design, providing real-time feedback with loading indicators, success messages, and error alerts.

Blog
- Developed a blog application using **Django** where user can login, create and edit the blogs.
- Utilized **Bootstrap** to enhance the front-end design.
- Implemented secure user **authentication features**, enabling users to **register, login,** and manage their blogs.

Netflix Clone
- Developed a responsive **Netflix clone** using HTML, CSS, and **JavaScript** from scratch.
- Ensured **cross-browser compatibility** and responsiveness for seamless user experience on various devices.
- Utilized **HTML5** for structuring the content, **CSS3** for styling and layout, and **JavaScript** for dynamic and interactive features.

Movie Search
- Technologies: HTML, CSS, JavaScript.
- Functionality: **Search movies using API**, display results dynamically.
- Future Enhancements: **Pagination**, Filters, additional API features.

Axis Bank NRI Project
- Developed the Axis Bank NRI project for opening NRI bank accounts and Portfolio Investment Scheme (PIS) accounts.
- Utilized PHP and Mezzio for server-side scripting and framework development.
- Implemented dynamic web functionality using, **Javascript**, **Ajax** and **jQuery** for enhanced user experience.
- Managed data storage and retrieval with **MySQL**.
